

# Dental Care With Oils

## Testimonials

I have a daughter who was considered a high risk dental patient from her first dentist visit. Her baby teeth came in with not enough enamel on them and she would have up to 5 cavities every 6 months even though she brushed, flossed, etc. After her first check up after using Dentarome for 6 months she had NO CAVITIES and that was two years ago if I remember right. In the past two years she had one small cavity.

Following is a wonderful testimonial from Mary Steger regarding YL's toothpaste. (It is the best) Thank you Mary for sending this.

I went to the dentist office to have my teeth cleaned the first of December. I had just started to use the Thieves Dentarome Ultra tooth paste. I thought it was wonderful and was telling everyone about it. Each time I used it, I felt like I just had my teeth cleaned by the dental hygienist. When I went for my cleaning I immediately told my dental hygienist Kathy about the product and how excited I was with it. She told me that my teeth didn't have the sticky plaque on it that was usually there and that my gums were pink and healthy looking. I also noticed that my teeth didn't look so yellow. I have tried many different toothpastes and nothing helped. Another hygienist came into the room and Kathy told her my story. She was also impressed and asked me if she could purchase a tube for herself. My first sale and I sold it with my excitement and the results of my teeth.

It's the BEST toothpaste ever. I could never go back to regular toothpaste.

Have a "Blessed and Happy New Year"!

Mary Steger

*Energy medicine...*

I have periodontal disease so the dentist cleans and checks my teeth every 3 months at 160 a pop. Well, I started using Thieves toothpaste and mouth wash after your oil seminar which was one month before my next cleaning. My check up prior to using Thieves toothpaste brought numbers like 2,3, 4, and 5 when they checked my gums. Hard to explain if you don't know what I am talking about but if you get a 6, you have periodontal disease and the dentist has to scrape your teeth down to where the bone is under your gum to get rid of the bacteria that can eat away the bone and then you lose your teeth. ( I was never good at flossing) ok, so one month later, my numbers had improved and the 5's were 4's or 3's and the 4's were 3's or 2's. That was just after one month so of course, I use both of the Thieves daily and will religiously and can't wait for my next cleaning in October. Talk about the cost of a dentist if he has to do anything to your mouth compared to the cost of the Thieves. It is soooooo worth it and you said at that meeting that using both meant that you didn't have to floss of which I haven't since using the Thieves.

Just thought you should know that I have first hand knowledge about the Thieves. I did try the Thieves cleaning solution on my living room windows because you or someone said that it expelled flies. It didn't get rid of them but they didn't like it and I didn't have as many. I don't know where the flies come from but I don't like them at all. That's all folks. kaki

**Dental floss** infused with Thieves® and peppermint essential oil. 131 feet/40 meters.

**How to use:** Break off about eighteen inches of floss and wind most of it around one of your middle fingers. Wind the remaining floss around the same finger of the opposite hand. This finger will take up the floss as it becomes dirty. Hold the floss tightly between your thumbs and forefingers. Guide the floss between your teeth using a gentle rubbing motion. Never snag the floss into the gums. When the floss reaches the gum line, curve it into a C shape against one tooth. Gently slide it into the space between the gum and the tooth. Hold the floss tightly against the tooth. Gently rub the side of the tooth, moving the floss away from the gum with up and down motions. Repeat this method on the rest of your teeth.\*

\*Recommendations are provided by the American Dental Association.

**Ingredients:** Thieves® essential oil, peppermint essential oil, soy wax, bees wax and nylon.

~~~~~

Thieves Spray is ideal for use on door handles, toilet seats, and any surface that needs cleansing to protect from dust, mold, and undesirable micro-organisms. This small bottle is perfect for traveling or keeping in your purse or backpack. Bacteria can be easily spread from person by way

After the last visit, I asked the dentist if he felt everything went okay with my son and he was very positive about the results of the visits. I then told the dentist that I never filled his prescription and told him of my application of the oils. I left the wide-eyed professional with a 'Missing Link' CD as well as 'Essential Oils in Ancient and Modern Medicine' DVD.

A few months ago a well intentioned elderly woman that I had never met before told me, 'Your teeth are so yellow, please, stop smoking!' I have never smoke even once in my life. Shortly later I switched my toothpaste to Dentarome Plus and today my teeth are so much whiter! Needless to say that I love Dentarome toothpaste.'

Aye Jin Masuda

\*\*\*\*\*

I just had my semi-annual dental appt on Wednesday, March 21st and noticed that there wasn't so much deep scraping as she was cleaning my teeth. At the end she said that my teeth were in really good condition and not much plaque, which is unusual, because I am prone to building it up very quickly as it has something to do with one's saliva content. I even floss faithfully every night. I was amazed! The only thing I can attribute this to is the use of Dentarome and Dentarome Ultra. Actually, I used up those tubes as of my vacation on January 20th and have been just using Crest again. Therefore, the action of the toothpaste has still been keeping my teeth clean!

After brushing my teeth with the Dentarome toothpaste I put an additional small dab of it inside my mouth where I felt a canker developing. It was gone the next day. Unbelievable! This all took less than 24 hours.

\*\*\*\*\*

I had some sensitivity around my gumline and asked my dental hygienist about it during a cleaning. She said that my gums were receding and that nothing could be done about it because it was just one of those things that happens as you age.

At that point in time, I had been using Dentarome Plus toothpaste for about a month and decided to add a drop of Melrose oil to my toothbrush about three times a week.

Seven months later at my next cleaning, I experienced very little sensitivity. I asked my hygienist if the gums were still receding and she said that they were not receding at all. I don't think she remembered the condition of my

**gums at my last cleaning.**

**She also said that there was very little plaque on my teeth and that there was minimal bleeding. She told me that my gums were in great shape - good color and tight around the base of the teeth and not puffy and swollen, which is a sign of infection.**

**Kimberly Johnson**

\*\*\*\*\*

**For years I suffered with receding gum pain that hurt every time I ate and every time I brushed. It was terrible. I also had plaque on the back of my teeth, top and bottom, that was only ever gone after I had my teeth cleaned, which was hardly ever because of my aversion to and the cost of seeing a dentist. Even when I did see a dentist, the plaque would return within days.**

**When I started to use Dentrome Ultra and Fresh Essence Mouthrinse, I was amazed because the plaque just disappeared from my teeth and wow...my teeth and gums don't hurt anymore! This has made life much more pleasant and oral care much easier and effective! I wouldn't use any other products now because I had used every toothpaste from 'commercial type' brands to the so called 'very best' natural toothpastes. I am sure I tried most natural brands. Now my teeth feel like my teeth really have been cleaned everyday without going to the dentist!**

**I recommend the Dentrome products to everyone I know because I really feel they keep my mouth healthy. The other neat thing is that they are very reasonably priced, like so many of the other personal care and other products from Young Living.**

**Robyn Grant**

\*\*\*\*\*

**What a difference! I started using Thieves last year. The first time I had my teeth cleaned after starting using Thieves, my hygienist asked me if I had started to floss. I'm 59 and I rarely floss and hadn't started. She continued to tell me that my teeth were as clean as she'd ever seen them (very little plaque.) She then checked my 'pockets', and was surprised to see that the deep pockets were actually more shallow. It was a good day at the dentist!**

**Since then I've shared tubes of Thieves Ultra Toothpaste with several friends, all of whom have reported that their first appointment with the dentist netted similar remarks from the hygienist. Miracle? I don't know, but it works and it feels good. What more could I want!**

**Caroline Johnston**

\*\*\*\*\*

**I realize that Young Living now makes a deodorant containing essential oils. However, I still love doing what I learned from other distributors years ago, and that is to use Dentarome toothpaste. I smell minty clean for just a few minutes and then it goes away. However, it keeps me odor free the whole day!**

**One thing that I've noticed is that the toothpaste somehow promotes hair growth. When I use it, my under-arm hair requires more frequent shaving. I've tested this by not using the toothpaste for a few days and the rate of growth slows down. Perhaps this may help people who are trying to grow hair on their head? If you have success, please let me know.**

**Sara Draughon**

\*\*\*\*\*

**One evening as I was getting ready for bed I noticed an animated line running between the kitchen and a teeny opening in the closet door frame in the bedroom. ANTS! I preferred to not step on them if I got up in the night but I didn't like the idea of going out to the garage to find caulking to fill the hole.**

**All this was happening as I brushed my teeth. A light bulb went on. "I'll caulk with toothpaste!"**

**Now I have added yet another job to the list of uses for Dentarome Plus. Not only did it fill the hole, ants appear to really detest it. I have since used it in the bathroom and in someone else's kitchen. So far the ants have left every time and stayed gone for months! Ants lost, I won!**

**Jan Meredith**

\*\*\*\*\*

**This happened without planning. Had some thieves on my fingers and used dental floss. The Thieves was on the floss and I think I may have invented a way to cut down bacteria between teeth.**

**Barb**

\*\*\*\*\*

**Hi Richard & Shauna,**

**A friend of mine in my downline, Michelle, just called me with some good news. She told me of a story about her sister's little boy. He had fallen & bumped his tooth. His tooth turned a dark gray color, the color it turns before falling out, like its dead, no more life in it.**

**Well, Michelle looked up in her handy Reference Guide book under teeth and it said that Thieves was good for teeth. And in a little side box, it said that Thieves has been known to help regenerate a tooth within 4 months. So she applied Thieves, along with a little Sweet Almond oil to dilute it a**

**bit. Four minutes later, the boy said: "Momma, my tooth feels weird". He wasn't used to the feeling of Thieves in his mouth, but he was fine with it anyways. His mom opened up his mouth and his tooth had turned pink. It was as if the blood was starting to come back into the tooth! And all in a total of 4 minutes. She has since applied Thieves to his tooth everyday for the past month & the tooth is like brand new and completely fine.**

**Michelle now has all of her family asking her about the oils, along with her sister! Thieves is the oil to carry around and share!**

**~~Sincerely, Angie Pijanowski**  
-----

**Just wanted to share the experience with everyone about Thieves. My daughter the skeptic, was having some problems with a tooth. Many years ago had a tooth broken in front and had to have a root canal and crown. She had been having trouble with the gum swelling and lump all the way up to her nose. The dentist put her on anti-biotics said the root canal was fine and that these things happen from time to time. After 3 X with anti-biotics the last time it got the lump I said let try thieves on it. Well it went away so far nothing has come back She was AMAZED. My Sister bless her heart has been real sick with sinus problems and it leaves her run down. Her glands are most of the time swollen. I asked her if she would try something for me and she was a little hesitant because her doctor had put her on more medication for her sinus problem and she was still puffy under one eye with pain and he r glands were still swollen when I would rub her neck . She started rubbing the thieves on her glands and putting the thieves under the puffy place by cheek. She also rubbed it on her gum on that side by cheek and guess what! She swelling disappeared in about 3 days. She called me up and said send me a bottle of that stuff. I love it. I also in a massage was using lavender on her for calming and she ordered that also.**

**I just love Thieves**

**Joyce**

**Thieves Oil Blend™** was created based on research about four thieves in France who protected themselves with cloves, rosemary and other aromatics while robbing plague victims.

This proprietary blend was tested at Weber State University, Ogden, Utah and found to have a 99.96 percent effective rate against airborne bacteria.

#### **Application:**

**Dilute 1 part EO to 4 parts vegetable oil. Possible sun/skin sensitivity.**

**Diffuse for 15 to 20 minutes every 3 to 4 hours. Apply to the bottom of the feet, throat,**

**stomach, or abdomen. Dilute 1:15 in vegetable oil and massage over thymus. For headaches put 1 drop on tongue and push against roof of mouth. Dilute 1:15 with vegetable oil for body massage. Put 4-8 drops on cotton ball and locate on vents. Add 2 drops to a wet cloth and put in clothes dryer.**

**This blend was created from research about a group of 15th-century thieves who rubbed oils on themselves to avoid contracting the plague while they robbed the bodies of the dead and dying. When apprehended, these thieves disclosed the formula of herbs, spices, and oils they used to protect them-selves in exchange for more lenient punishment. This blend of therapeutic-grade essential oils was tested at Weber State University in Ogden, Utah in 1997the studies showed the anti-bacterial effectiveness of the Thieves blend against airborne microorganisms. One analysis showed a 90 percent reduction in the number of gram positive Micrococcus luteus organisms after diffusing Thieves for 12 minutes. Then after diffusing Thieves for a total of 20 minutes, there was a 99.3 percent reduction. Another study against the gram negative Pseudomonas Aeruginosa showed a kill rate of 99.96 percent after just 12 minutes of diffusion of this blend. The oils are highly antiviral, antiseptic, antibacterial, anti-infectious and helps to protect the body against such illnesses as flu, colds, sinusitis, bronchitis, pneumonia, sore throats, cuts, etc.**

#### **ANTIVIRAL EFFECTS OF EUGENOL:**

**Eugenol strongly inhibits growth of HSVI and HSVII**

**Eugenol significantly delayed the onset of herpetic lesion on the eyes of infected animals.**

#### **TOXIC MOLDS:**

**1. Aspergillus parasiticus is a soil-borne fungus growing on both living and decaying plant matter.**

2. This mold produces mycotoxins as metabolic by-products.
3. One mycotoxin, aflatoxin BI has been identified as being the most toxic, carcinogenic, hepatotoxic and potentially mutagenic.
4. Dr. Radwan Farag found that clove oil at only 6-8 parts in 10,000 totally inhibited mold and aflatoxin production.

CLOVE OIL is in the blend of Thieves. See the effects of Thieves on Aerosol-borne Bacteria

#### BACTERIA COUNT(CFU) STARTING AT 0 TO 4500

1. With the bacteria of M. Luteus it was around 4100 and after using Thieves the count dropped to around 700
2. With P. aeruginosa it was around 2000 and after using Thieves it dropped to 1
3. With S. aureus it was around 2300 and after using Thieves it dropped to 1000.

#### NOW THE EFFECT OF TIME ON BACTERIA COUNTS:

##### THE BACTERIAL COUNT (CFU) 0 TO 10000

1. Bacteria starting out at 10000 at zero minutes
2. After 3 minutes of diffusing it dropped to 5000
3. After 6 minutes of diffusing it dropped to 800
4. After 9 minutes of diffusing it dropped to 2
5. After 12 minutes of diffusing you can hardly see it.

I hope you can see why you can not afford not to have a diffuser going in your home to protect your family from airborne disease. You can see from the above studies how effective it is to Diffuse Thieves to kill airborne bacteria.

#### Thieves Blend Contains:

Clove (Syzygium aromaticum) was another oil from the Orient hailed as an oil of great abundance; those who possessed it were considered wealthy. This oil is one

of the most antimicrobial and antiseptic of all essential oils. Clove is antifungal, antiviral, anti-infectious, and antibacterial. It works as a general stimulant and is used to treat sinusitis, bronchitis, cystitis, and cholera.

Lemon (*Citrus limon*) has antiseptic-like properties and contains compounds that have been studied for their effects on immune function. It increases microcirculation, which may improve vision. It may serve as an insect repellent and may be beneficial for the skin. Lemon has been found to promote leukocyte formation, dissolve cellulite, increase lymphatic function, and promote a sense of well-being. Its fragrance is stimulating and invigorating.

Cinnamon Bark (*Cinnamomum verum*) is the oil of wealth from the Orient and part of the formula the Lord gave Moses (Exodus 30:22-27). Cinnamon oil is anti-infectious, antibacterial, antiparasitic, antiviral, and antifungal. Cinnamon oil was regarded by the emperors of China and India to have great value; their wealth was measured by the amount of oil they possessed. Traditionally, it was thought to have a frequency that attracted wealth and abundance. Physically, cinnamon bark oil has many attributes; it is a powerful purifier, it is a powerful purifier and oxygenator, and it enhances the action and the activity of other oils. Researchers, including J. C. Lapraz, M.D., found that viruses could not live in the presence of cinnamon oil.

***Cinnamon Bark (*Cinnamomum verum*) is one of the most powerful antiseptics known. It is strongly antibacterial, antiviral and antifungal.***

Eucalyptus (*Eucalyptus radiata*) is anti-infectious, antibacterial, antiviral, expectorant, and anti-inflammatory. It has strong action against conjunctivitis, vaginitis, endometriosis, acne, bronchitis, and sinusitis.

Rosemary (*Rosmarinus officinalis* CT cineol) is antiseptic and antimicrobial and may be beneficial for skin conditions and dandruff. It may help fight candida and is anti-infectious, antispasmodic, balances the endocrine system, and is an expectorant. It helps overcome mental fatigue, stimulating memory and opening the conscious mind. It is high in cineol-- a key ingredient in antiseptic drugs.

***Eucalyptus (*Eucalyptus radiata*) is anti-infectious, antibacterial, antiviral, and anti-inflammatory.***

**Lemon (*Citrus limon*) has antiseptic-like properties and contains compounds that amplify immunity. It promotes circulation, leukocyte formation and lymphatic function**

**Safety Data: If pregnant or under a doctor's care, consult your physician prior to use. May be irritating to those with sensitive skin. Avoid eye contact. In case of accidental contact, put a few drops of any pure vegetable oil in the eye and call your doctor if necessary. Never use water.**

**Application: Diffuse for 15 to 30 minutes every 3 to 4 hours in work or home environment. Apply to bottom of feet, or rub over feet, throat, stomach, and abdomen. Dilute one drop of Thieves in 15 drops of V-6 Mixing Oil or Massage Oil Base and massage over thymus. It is safest when applied to the bottom of the feet as it may be caustic to the skin. It is best to dilute with V-6 Mixing Oil. For headaches put one drop on tongue and push tongue against the roof of the mouth.**

**Companion Oils: Immupower and Exodus II (to be alternated).  
Note: Studies conducted at Weber State University in Ogden, Utah (Ogden, UT)**
